TransactRx Part D Vaccine Manager is the nation's leading solution for healthcare providers to overcome the billing and reimbursement challenges associated with administering vaccines covered by Medicare Part D to their patients. With Vaccine Manager, providers no longer need to file paper claims or ask their patients to pay full costs out of pocket and then try and get reimbursed.

The easy to use web based system enables providers to determine if a patient has Medicare Part D coverage, which Part D plan to bill, the exact amount of patient financial responsibility for a specific vaccine and the amount the provider will be reimbursed. All before the vaccine is administered to the patient.

Then after the vaccine is administered with one click the provider can submit a claim to the appropriate plan and receive confirmation of payment of the claim in real time.
